\$2.00 A YEAR IN ADVANCE

THE WORLD OVER

PLAN, DONATE WHEAT TO NEEDY

LINDBERGH AGAIN MENTIONED

MUTINEERS SURRENDER SHIP

SEEKS AMEND CRIMINAL CODE

Steps to eliminate a part of Canada's wheat surplus by donating wheat to the Red Cross welfare and relief bodies for distribution among the unemployed were proposed by the possibility of similar legislation to obtain credits to China, were urged in the House of Commons on Monday by Hon. W.R. Motherwell, former Minister of Agriculture.

ROANOKE, Va., Feb. 9.—Two youths were arrested recently and charged with attempting to extort \$50,000 from Colonel Charles A. Lindbergh in connection with kidnapping of his second son as the alternative to payment.

Joe Bryant, 15, and Norman Harvey, 26, both residents of Roanoke, were taken into custody shortly after they were found to cash a \$17,000 check with which they had apparently passed themselves as representatives of the famous flyer, had planted in a tree stump.

The second threat to Colonel Lindbergh was made public less than 12 months from the night his firstborn was spirited away from his crib and murdered in the Sourdough Hills of New Jersey.

BATAVIA, Java.—Eighteen men were killed and 25 wounded by a 100-pound aerial bomb which put an end to the five-day massacre of native rebels on the island of Sumatra. Fe 20, 1932. Until that air bomb landed, despite the fact that the mutineers were menaced by a fleet of pursuing war vessels and half a dozen aeroplane fighters.

Three Europeans and 15 Japanese natives were killed by the bomb and one Dutch sailor was slightly wounded.

The second threat to the rebels in which the mutineers were not the 16th men to be killed with which their leader was armed, took place at dawn of the southwest Sumatra coast, about 400 miles northeast of Batavia.

Fire started around the cruiser, and the home experiments of the mutineers were over the side into life boats. Others surrendered. The fire did little damage and soon the master of the cruiser, who had been left ashore when the mutineers took her over, went aboard his command and the warship had orders to return to Batavia.

James S. Woodworth, leader of the Co-operative Commonwealth Federation, has again sent a bill to the Legislature, succeeded in introducing a bill to repeat the famous Section 98 of the criminal code, dealing with unlawful assemblies. The federation leader succeeded this year where last year he failed. The House refused to let him

CARBON 'SPIEL FEBRUARY 28, MARCH 1 AND 2

At a meeting of the Executive of the Carbon Curling Club, held on Monday of this week, it was decided to hold the annual bonspiel on Tuesday, Wednesday and Thursday, February 28 and March 1 and 2.

W. H. H. Smith was appointed bonspiel secretary, and a prize committee was arranged.

This year all non-members wishing to play in the bonspiel must pay a fee of \$35.00 each or \$10.00 per rink. This does not however, pertain to rinks outside the Carbon district. Visiting rinks may enter free.

The Carbon Curling Club will be assessed \$10.00 each should they play in the bonspiel, this money to be used to provide prizes for the various events.

The executive committee have decided that this year any local player who has not paid his annual and bonspiel dues cannot play in the local bonspiel.

It is to be hoped that the Carbon curlers will be successful in their efforts to make the bonspiel a success, no doubt the prize list will be equal to or better than last year's.

Outside rinks must bear in mind that all entries must be in by 6 p.m. on February 28th.

ALBERTA NEWS

Reduction of \$1.00 in fees for high school an matriculation examinations is announced by the Provincial Department of Education.

Total production of coal in Alberta for 1932 was \$4,000,000, compared with \$4,200,000 for the previous year. The 1932 production included 5,578,831 tons of domestic, 565,479 tons of sub-bituminous and 1,738,753 tons of bituminous coal.

The creameries of Alberta received 510,459 pounds of butterfat in cream during the four weeks ending January 28th, 1933, a decrease of 7,776 pounds or 8 per cent under the receipts of the corresponding weeks of 1932 and an increase of 65,288 or 11.8 per cent over the receipts of January 1931.

Only 492 claims for half insurance were received with respect to the 1932 season, by the municipal half insurance board, according to its annual report just issued. Total acreage covered by the board in 1932 was 452,200 acres, an increase according to its annual acreage of over 50 per cent from 1931. Hall fell on forty different days in the season.

introduced the same bill last year, although it had been passed by the House of Commons, but rejected by the Senate, several times in the past 10 years.

HOCKEY NOTES

The Carbon Juniors seem to be the only winning local team in the realm of hockey this year, this team being successful so far. The two encounters this past week and yesterday the local team played the Swallow Juniors and won out \$1. Sunday afternoon they played against Avondale and won 4-2.

Wednesday night was Carbon's big-up. S. Malton, goal; H. Paxon, C. Read, S. Paxon, W. Rogers, Clifford Gordon, W. Skerry, F. Paxon, H. Wise, R. Wise and W. Oliphant.

The next junior game will be played at 7 p.m. Saturday afternoon when Carbon will play Rockford at the local rink.

Midland Wins 5-1

The Midland team played the local seniors at Carbon on Sunday afternoon and were victorious by a score of 5-1. The Carbon team was short handed and had to play with only 10 men. They managed to put up a fair goal showing in spite of the stormy weather, which kept the crowd of spectators at home.

Carlson's lineup on this occasion was: L. Hastelet, goal; H. MacDonald and Alex Paxon, defense; B. Oliphant, W. Paxon, E. Rouleau, B. Ramsay and W. Trepanier, forwards.

BIG TIME HAD AT OLD TIMERS DANCE, FRIDAY

The Carbon Old Timers' Association

whist drive and dance, which was held in the Farmers' Exchange hall on Friday night last, proved a popular affair and the 100 or so old timers availed themselves of the opportunity to again don their old favorites.

The first part of the evening was spent in whist and later dancing was commenced. Refreshments were served at mid-night and in this connection the old timers were given a hearty welcome.

During the evening about forty old timers took out membership cards, although fully twice that number were eligible to do so. At this time the Association wishes to point out that persons who are not members and are not recommended as members, are then entitled to the privileges of the Association, whose sole aim is to benefit only its members. Take out your membership card now, you are eligible if you have been in Alberta prior to December 1, 1929, and now reside in the Carbon district.

A DAILY PRAYER FOR ANY CREED

Teach me that 66 minutes make an hour; 16 ounces make one pound; and 100 cents make one dollar. Help me so to live that I can live at night with clear conscience, without a grim印象 on my pillow and unbent by the faces of those to whom I have brought pain.

Grant that I may earn my meal ticket on the square, and then in earning it I may do unto others as I would have them do unto me.

Teach me to the fruits of the other world but reveal to me my own.

Guide me so that each night when I go to bed I may be able to say that I have a blessing to me, I will have nothing to conceal.

Keep me young enough to laugh with little children, and sympathetic enough to be considerate of old age.

And when I am old and decrepit, give me the strength of memory, the trend of soft feathers and the comings and goings of wheels in the yard—make the memory short and the courage strong.

SECOND CARNIVAL TO BE HELD

FRIDAY, FEBRUARY 24th

—A carnival and dance will be held at the Carbon skating rink on Friday evening, February 24th, commencing at 8 p.m. Prizes will be given for the best costumes and winners of races. Following the carnival the band will be on the program and at 11 p.m. dancing will be held on the ice. The Carbon 8-piece orchestra will furnish the music and popular admittance fees will prevail. Adults 50c; adults not skating, 25c; children 15c. Be there!

Provincial Liberal Ass'n Outlines Party Platform

A meeting of the Provincial Liberal Executive was held in the MacDonald Hotel, Edmonton, on Wednesday, February 8th, and during the forenoon reports were received from representatives of all the provincial associations.

In no uncertain terms the opinion was expressed that the Government had lost the confidence of the people and if no election were held at the present time the Brownies administration would be wiped out.

At the next meeting of the Canadian Bank Act, a central national bank, whose function will be to direct and control the issue of currency and the extension of credit through the banks of Canada.

Over 500 Single Men Placed on Alberta Farms

All other restrictions on trade in order to effect a reopening of the market for our produce.

15. Favourable Federal legislation for the supervision of the use of securities by the public and the protection of investors.

16. Favourable establishment at the next revision of the Canadian Bank Act of a central national bank, whose function will be to direct and control the issue of currency and the extension of credit through the banks of Canada.

17. To apply the net revenue derived from the sale of mineral resources and all other net capital revenue to the reduction of the public debt.

18. A proper division of the revenue collected by the Provincial Government as between the Provinces, the Municipalities and the School Districts so that the proper amount of taxation may be fairly distributed.

19. A complete revision of all sources of taxation in order that the taxes may be reduced and made to apply more fairly on all of the people.

20. In the administration of the affairs of the Department of Agriculture, the administration of the Alberta Government telephone system in order to restore it to a state of efficiency.

21. To reorganize the Department of Agriculture and to give it the leadership in all branches of agriculture and particularly in the matter of obtaining markets for farm products.

22. To increase the efficiency of primary education and to adequately maintain and educate the public school system.

23. To present maintenance and improvement of all the Public Health services of the Province.

24. The proper safeguarding of the ownership and development of power for the benefit of all the people.

25. Unemployment relief should be afforded to those entitled to it but it is a Federal responsibility and the Province and Municipalities should be relieved of all liability in connection therewith.

26. To effect such legislation and take other steps as will immediately give a fair measure of relief to the people of Alberta from the burden of both public and private debts and interest charges.

27. To support the system of control of insurance.

28. To fight for an immediate cancellation of tariffs and the removal of a

Nomination Day For Carbon M.D. Saturday, Feb. 18

Saturday, February 18th is nomination day for candidates for three divisions in the Municipal District of Carbon No. 275, and for a member for the Drunken Hospital board.

Commencing at 1 o'clock the electors of the Municipal District of Carbon No. 275 will be in the hall of the Drunken Hospital board.

At the election the electors of the Municipal District of Carbon No. 275 will be in the hall of the Drunken Hospital board.

It is alleged that it was the duty of the provincial government to replace the Drunken Hospital, and that O'Rourke failed to do so because of the dangerous condition of the road at that time. Other defences repudiating allegations of negligence are also set up.

J. J. Greenan, Carlton, is acting for the plaintiff; Messrs. Short, Ross, Shaw and Mayhood for the defendant.

M.D. OF CARBON DEFENDS 30000 DOLLAR ACTION

Plaintiffs Allege Negligence; Charge
Road Not in Proper Condition

Trial of the \$30,000 damage action against the Municipal District of Carbon No. 275, and the Drunken Hospital, in any suitings in Carbon this year, according to notification filed at the Court House, Carbon. The action involves responsibility of maintaining a highway.

The plaintiffs are James P. O'Rourke

Carbon farmer, and his infant son, Basil Laconomi O'Rourke, who claim that Mrs. Mary Ann Ide O'Rourke, wife of James O'Rourke, was killed through negligence of the municipality in failing to keep a road in proper condition.

The accident in question occurred about 4:30 o'clock May 26, 1932, on the road between Sharpley and Carbon. The car in which they were riding was returning to Carbon when the plaintiff, his wife and the infant son, were struck by a car which had been

driven into a ditch, and the plaintiff, his wife and the infant plaintiff were

thrown from the vehicle.

Plaintiffs allege that the accident occurred on a highway constructed by the municipality in the name of the farmers of the road to keep the road in repair, for at least 44 hours before the accident the municipality knew "or should have known" of the disrepair, it is alleged.

O'Rourke was between 1 and 2 years of age at the time of the accident, while the infant plaintiff was aged four years. It is stated Plaintiff husband alleges he has been deprived of the comfort, companionship and services of his wife, and the infant plaintiff of the services of the mother, the guidance and care of his mother.

O'Rourke seeks judgment for \$40,000 damage to the car; \$350 funeral and other expenses; and \$20,000 general damages. The infant plaintiff seeks \$10,000 general damages for loss of his mother.

The municipality answers by stating that the accident occurred not on a road maintained by it, but on a "diversion" or temporary road constructed at the time of the accident to the fact that a bridge over a stream was washed out May 26, 1932.

It is alleged that it was the duty of the provincial government to replace the Drunken Hospital, and that O'Rourke failed to do so because of the dangerous condition of the road at that time. Other defences repudiating allegations of negligence are also set up.

J. J. Greenan, Carlton, is acting for the plaintiff; Messrs. Short, Ross, Shaw and Mayhood for the defendant.

COMING EVENTS

The regular meeting of the Huxley to Grange District Association, U.F. A. will be held in Swalew on Wednesday, February 22nd. A large crowd is expected and the visitors are invited to deal with a number of topics and to hear the speaker of the afternoon. A. B. Claypool, M.L.A.

The annual congregational meeting will be held at the church on Thursday evening, February 21st, at 8 p.m. A full report of all activities of the church for the past year will be given and plans formulated for this year. This meeting is not confined to church members and all who are interested are cordially welcomed. The Ladies Aid will serve refreshments.

The Way Out.

The whole world is looking for a way out of the terribly complicated financial situation. The world is looking for a way out of the direct result of the Great War. Whatever may be the fundamental cause to the intensity and widespread character of the present depression, the main root cause of the depression was the war and the terms stipulated in the peace treaties. This is now universally recognized. No one seeks to deny it unless he has some particular end to serve by attributing the world's present troubles to some other cause.

One of the results of the Great War, and the treaties by which it was ended, has been the development of an intensely narrow nationalism, which, in turn, has led to the adoption of those policies which today are strangling the trade of the world and causing all nations to seek ways and means of making themselves self-contained economic units. This is the whole cause of the present depression. The world is seeking a way out of these policies by which all nations are endeavoring to produce both primary and manufactured products which are not natural to their particular countries.

It is one of the outcomes of the war that every nation is desirous of promoting exports while at the same time shutting out imports—an undertaking which can be easily accomplished.

More and more we see that men and women are coming to realize that there are only two ways whereby the world can be brought out of the impasse in which it now finds itself. One is through the instrumentality of another great war; the other is by the nations of the world getting together in conference to undo as far as may be possible the blunders made following the last war and to remedy the mistakes which have been, and still are, perpetrated.

There may be some inhuman creatures who would welcome the first cut, but they are few and far between. Another war would create a huge demand for products and commodities of all kinds, with a consequent enormous increase in prices, because it must be admitted that war, except that any other would be, is a most expensive way of settling international disputes. But apart from the horrors of war, the final result would be that it always has been throughout history—the development of another depression surpassing in its intensity and duration even the one through which we are now passing. War would be no cure for our financial and economic ills; it would merely tend to raise the depression, only to plunge us back into it when it ended.

God forbid there should be another war, but there will be unless the nations of the world come to their senses, get together in conference, shun their narrow nationalism, and work together in union for the common good, instead of at cross purposes, each seeking to advance itself at the expense of the other.

Yes, we are people today so utterly blind or selfish that they go about destroying every effort that is put forth to bring the nations into conference, and let us hope, ultimate agreement and co-operation. These people take the position that conferences are useless; they scoff at them; they predict failure for each and every one of them in advance of their meeting. But if the world's salvation is to be found through the medium of conferences, then its final destruction will be brought about by war, because inevitably, financial and economic warfare—in which the nations now are engaged—will, unless stopped, end in physical war.

These people point to the many conferences already held, and they ask: "What good has come out of them?" They say the Lausanne Conference was a failure, yet at that conference the majority of Europe agreed to carry on with the war reparations, which will bring in billions of dollars of millions. True, that decision is dependent upon further action yet to be taken, but it was a long step forward toward a solution of the war reparations and war debt problems.

The same people say the Ottawa Economic Conference was a failure. Well, that depends upon a person's viewpoint. Some very able statesmen and economists believe that the Ottawa Conference did not lead to anything other than a new set of policies to follow, while others, it is true, consider that mistakes were made in that it did not accomplish much more in the direction of trade, and that the results were not as good as they could have been.

Another world conference is to be held this year, called specifically to deal with financial and economic problems. All the principal nations of the world will be represented, and the results of the conference are again being held in doubt, but it will not be a failure. If it is, it will be because it does not adopt such an attitude as are not patriotic and are not in the best interest of the world. People who adopt such an attitude will be much gains, and every small gain is the only way for further gains, just as every loss leads to other and greater losses.

Those who do not believe world conferences in advance are, in fact, rejecting the world's only alternative to war as a means of settling differences between nations. There are more conferences now than ever before in the history of the world. People who believe that war is the only thought are striving as hard to prevent war. In past ages war resulted because the nations did not try to get together and settle their differences in a friendly manner. And the result of that, in the long run, was the only alternative, the inevitable result.

Those who go about destroying, criticizing, and condemning such conferences as useless, are not more war-mongers, advocates of international bloodshed and revolution, apologists of the doctrine of physical force, than those who methods of compromise and evolution, though more forward to better things.

Launching the "Normandie."

When the "Normandie," the world's largest liner, was launched at St. Nazaire, France, recently, a ton of soap, two and one-half tons of lard and 43 tons of tallow were needed to grease the launching ways. The soap was insisted in the launching. The President of France attended, and his wife, Mme. Lebrun, broke the bottle of champagne over the bow.

Nervous—Could Not Sleep Tired Out All The Time

Mrs. George Sibley, Newburgh, N.Y., writes: "I was very tired all the time at night and fell tired all the time during the day."

A neighbor told me about Milburn's Heart and Nerve Pills, and as she was using them at the time she gave me some to try. I found they were doing me so much good I procured two boxes and they proved of wonderful help to me."

For sale at all drug and general stores, see ad under "The F. Milburn Co., Ltd.," in the classified section.

Has Seen Canada Grow

Montreal Woman Emigrated From England 87 Years Ago

Five years before Queen Victoria became Queen of England, Sarah Davy was born in London, England. Eighty-seven years ago—the year Abraham Lincoln was assassinated, she came to Canada where she has remained ever since.

Mrs. Ryder, as she now is, celebrated her 100th birthday, at her home in Montreal, recent reports say. The sunlight streaming in her white-to-brown hair that needs no lace cap to hide the wear of time—Mrs. Ryder told of the Canada of 1865.

"I expected Canada would be very bushy," she said, "and it was. We lived in Inverville, a town nearly 50 years and all my children were born there. Those were good days. In winter we had long sled drives and in summer we went over the country roads many more country, real country roads, than we have today. We drove in Inverville and the surrounding country is very different now. And the winters were ever so much colder."

Mrs. Ryder does not worry about her health. "She eats three good meals a day," her daughter said, "and has a glass of ale every night before she goes to bed."

The old lady is not of a garrulous nature, but she does like to talk. "I like to see the girls enjoying themselves," she said, "but I don't think mothers should allow them to stay out all hours of the night as if they weren't interested in them."

Plan Is Developing

Sea-Air Service Would Make Base At Galaxy, Alberta, Necessary

A combined sea and air passenger service, that would reduce the traveling time between New York and London to three and a half days, has attracted the interest of influential Nova Scotia bankers.

The project calls for establishment of a large base at Galaxy, on the west coast of Ireland, for aeroplanes operating in conjunction with fast trans-Atlantic steamship services. A modern airfield would be required to accommodate the liners themselves.

C. H. Coldingham, president of the Irish Trans-Atlantic Corporation, Ltd., which is developing the scheme, with the support of a number of persons who have indicated their willingness to back the project, Dutch and Canadian interests, it is learned, are also watching the development closely.

Galway is ideally situated for the scheme, it is claimed, and the trip to be saved in the New York-London route now if the fast boats put in and the passengers made the rest of the trip by air.

The scheme already is so far advanced that it has drawn the interest of the Canadian, British, and Dutch governments, which see in it immense commercial and other possibilities.

Ceylon Wants Throne Back

Heats All at Windsor Castle For Over Hundred Years

It is requested that the ancient throne of the Kandyan kings, which has been at Windsor Castle for more than 100 years, should be returned to Ceylon, its traditional home, by the British government.

The Ceylon state council to the secretary of state for India said:

"We have no objection to the return of the ancient throne to Ceylon, as it was considered out of keeping with the decorative scheme."

The throne, which is an imposing structure of gold and silver, with dragons of cut crystal with amethyst eyes, is ornamented with floral decorations. The plating is set with gemstones.

A Delicate Operation

Doctor Stops Woman's Heart and Removes Blood Clot

Dr. Clarence Crawford of Stockholm, Sweden, announced a success for operation on a woman patient whose heart had stopped for four minutes when he removed a blood clot from the organ.

The patient regained her health. It was claimed to have been the eighth operation in his lifetime, three of which were by Dr. Crawford. Two others were in Sweden and three in Berlin.

Merchandise exports from Japan in November were valued at twice those of the corresponding month of 1931.

Water is the chief constituent of all living things.

Win Progress Prize

Manitoba Farmers Given Second Award In C.N.R. Competition

The community of Hanover, centering on the town of Steinbach, east of Winnipeg, was awarded first prize in the C.N.R. competition in community progress competitions for communities of European origin in Manitoba, according to information from Dr. W. J. Black, director of colonization and agriculture, for the company. This is the third year's competition of these competitions.

The first prize community in Manitoba consists of six school districts, containing 1,000 families.

This is a Manitoba settlement, started more than 50 years ago.

In the first few years of settlement they had no capital for equipment, but gradually established themselves as agriculturists, with their own initiative and endeavor. Today this community is one of the foremost in an agricultural standpoint in Manitoba.

The board of judges, composed of Principal John Mackay, Manitoba College, Dr. W. J. Black, Birtle, and Brother Joseph Fink, president of Plover school, awarded second place to Vito, a Ukrainian community in southeastern Manitoba, and third place to Sifton, which comprises the third largest community in the Dauphin municipality, a Ukrainian community north of the town of Dauphin.

History As Understood

Soull Wonder Answer Of One Student Started Teacher

The person who told this story was actually it happened. The young students were answering an oral question in history. The teacher asked, "Who was Anne Boleyn?"

Answered a bright-eyed lad, "A flat iron."

He had to repeat his answer several times before the teacher understood. Then she demanded that he repeat his answer again, and he did. "She was a flat iron," he insisted, and leaped through the history until he struck the paragraph that proved his point.

"Here you are," he said, and triumphantly displayed the following: "Henry VIII. pressed his suit with Anne Boleyn."

A Privileged Character

Dog's Son Wins Job In Colorado House of Representatives

Hedgey Peter is listed in the University of Colorado student directory. His address is the Sigma Alpha Epsilon fraternity house.

The project calls for establishment of a large base at Galaxy, on the west coast of Ireland, for aeroplanes operating in conjunction with fast trans-Atlantic steamship services. A modern airfield would be required to accommodate the liners themselves.

Hedgey Peter is a police dog and is the son of a police dog. When the police officers were preparing their pledge list for the school directory the name of Hedgey Peter was slipped in the list and as a result Hedgey gets his name on the Sig Alpha house.

"He's the most obedient puppy we have," said Gilbert Perkins, president of the fraternity.

Delicacy From China

Ten-Year-Old Egg Exhibited At "Chinese Evening" In Boston

An exhibition of curios including a ten-year-old egg which was brought from China by Mrs. H. W. Dunning of Boston, was held at the "Chinese Evening," conducted in Jacob Sheep House by the Boston University Women's Graduate Club.

The egg was preserved according to Chinese custom in quicklime, which makes it very hard-boiled. Eggs of this sort are considered a delicacy in China, according to Mrs. Dunning.

The egg was prepared according to Chinese custom in quicklime, which makes it very hard-boiled.

It is claimed to be a delicacy of eggs of this sort are considered a delicacy in China, according to Mrs. Dunning.

National Radium Commission Chairman Draws Attention To Dangerous Nature Of Substance

Radium, the rarest and costliest of minerals, commonly regarded as a valuable servant of surgery in the fight against cancer, can be the most lethal and dangerous of poisons in the hands of the unscrupulous and the ignorant.

In making this statement to a conference of experts, Viscount Lee of Fareham, chairman of the national radium commission, drew a startling picture of the potentialities for evil if the substance were put to a criminal use, says a London news paper.

"A tiny flask containing one gramme," he declared, "would be sufficient to murder your neighbour next door, or to blow a hole in the wall of a modest detached house with out arousing suspicion in the minds of the persons involved."

Urging strict government control of radium, Lord Lee also warned against the use of certain cosmetics, certain patent medicines and confections containing radio-active substances, some of which, he stated, were so deadly that their preparation or sale should be "sterily suppressed."

Lord Lee's pronouncement was made while delivering the Silvanus Thompson lecture to the conference of the British Institute of Radiology at Central Hall, Westminster.

While there was doubt about the actual danger, he said, "it is declared, there was none about its palliative effect and its power to relieve pain. On that ground it could claim to be of benefit to mankind. Its greatest foes are ignorance and overindulgence."

It was the conviction of the national radium commission that "radium is far too dangerous a substance to be let loose upon mankind. In the most lethal and dangerous of its uses it should be prohibited from importation or sale, except under special license."

Under existing conditions the extreme costliness of radium was perhaps the public's best safeguard. At about \$1,000 a gram there was not much risk in its becoming a "best seller."

As an example of the perils of carelessness with radium, Lord Lee described the case of the New Jersey girls who while using luminous watch dials with a preparation containing minute quantities of radium or mesothorium, pointed the brushes at intervals with their tongues.

In many cases the consequences did not become apparent until more than four years after the girls had left their employment.

"How many girls perished as a result of this carelessness of radium is not accurately known," added Lord Lee. "But 18 have certainly died and some 30 more are regarded as doomed."

Referring to patent remedies, cosmetic preparations and the like containing or professing to contain radium or radio-active substances, Lord Lee stated that in some cases these were harmless. They were merely fraudulent because they contained no radium at all, or only a negligible trace.

On the other hand some commercial preparations containing radium were so potentially deadly that their preparation or sale should be sternly suppressed by law and made a criminal offense.

"I refer particularly," Lord Lee went on, "to the so-called 'radium waters.' This deadly beverage really contains an appreciable amount of radium, and its first effect is undoubtedly agreeable and pleasant. So much so that one of its principal victims, a Pittsburgh iron-master and an amateur golf champion, not only drank large quantities himself, because it seemed to 'improve his game,' but was leading the game among his social circle as it gave to his sporting friends. What became of them I do not know, but he himself died recently from neuritis of the jaw, acute anaemia and abscesses of the brain."

The autopsy revealed the largest amount of radium ever found in a human body—some thirty micrograms, enough to kill three men or women.

"This was perhaps an extreme case, but a credulous public in this country is being flooded with advertisements of quick 'radium remedies.'

"None of these, I am informed, can have the slightest therapeutic value, and to such extent, if any, as they

contain radium they must be harmful and potentially dangerous."

"In my view the preparation or sale of radio-active preparations designed for either internal or external use should be absolutely prohibited."

A New Narcotic

Believed To Be More Effective Than Morphine And Non-Habit Forming

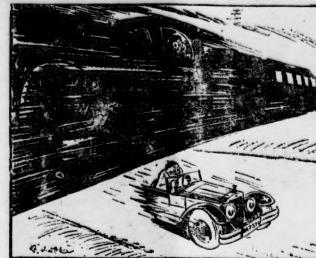

Medical science is expected to announce soon the perfection of a narcotic which is said to be more effective in relieving pain than morphine or heroin. This sedative—dilaudid—is now being studied in the United States Public Health Service and leading clinics throughout the country.

German and Swiss scientists also have made remarkable claims for dilaudid. Several high-ranking German doctors assert that sedative non-habit-forming.

The Mayo Clinic is understood to have shown that dilaudid is especially valuable in obstetrical, cancer and incontinence.

A report received by Harry J. Adams, Commissioner of the Federal Bureau of Narcotics, from the Mayo Clinic stated that dilaudid in one-sixth the dose of morphine proves as effective.

Dilaudid is a cousin of heroin. Chemically it is di-hydromorphone hydrochloride.

"Heavens! What a noise the old bus is making!"—Der Lustige Sachen.

Island Less Productive

Native of Tristan da Cunha Even Grew Petatoes

Britain's most lonely outpost, the island of Tristan da Cunha, in the South Atlantic Ocean, refuses now to yield to its 162 inhabitants all the produce it needs.

The tiny island used to produce potatoes, but, according to Rev. A. G. Partridge, missionary and former governor of the island, who returned to London, the production of potatoes has stopped.

Mr. Partridge was recently on furlough from the island but returned somewhat hurriedly under the authority of the British Government with the status of governor because a Brazilian scientific expedition was to land on the island.

The expedition was to be a scientific one, but the position was abandoned, however, but in the meantime Mr. Partridge officially appointed one inhabitant as chief of the island.

Mr. Partridge was given a supply of seeds and a Japanese war ship called at the island. He married three couples, christened a baby, packed his kit and sailed away with the ship within three hours of its arrival. It was at least a year before another ship calls and it is learned how the first native governor is conducting his duties.

While Mr. Partridge is the island the new chief ordered the laziest woman on the island to stand on stocks constructed of a soap box.

Could Take Her Choice

But Admirer Of Famous Pianist Was Due For Disappointment

Padoverholt, has, like many another nobody, undergone the ordeal of complying with autograph hunters' demands for signatures. But the famous pianist, however, was asked by what is said to have happened on one occasion, draws the line at the distribution of mementoes in the shape of samples of his beautiful hair, best grafted by nature with a profusion of that.

It was when he was visiting America that a well-known society woman had the audacity to hand through the window of his private car a gushing epistle, winding up with a request for "a lock of hair" to add to that Padoverholt's secret collection.

FREE TRIAL OFFER OF KRUSCHEN

If you have never tried Kruschen—try it now at our expense. We have distributed a great many special offers to our friends, and it is easy for you to prove our claims for yourself. Ask your druggist for the Kruschen G.I.A. 25¢ bottle.

This consists of our regular 25¢ bottle together with a special 25¢ bottle which contains a special ointment. When the trial bottle first goes to the druggist, it is filled with the regular ointment. After one week, when the trial bottle first goes to the druggist, it is filled with the special ointment.

Your druggist is authorized to return the trial bottle to us.

You have tried Kruschen free at our expense.

We are the only ones who have tried Kruschen free at our expense.

Write to: KRUSCHEN CO., LTD., 1000 Yonge Street, Toronto.

WORLD HAPPENINGS BRIEFLY TOLD

A hitherto unknown sphynx is reported to have been unearthed near the second pyramid.

A currency note issued and signed by General Gordon during the siege of Khartoum in 1884 was sold in London recently for \$7,500.

The Canadian government, between Canada and United States, during 1932, declined by more than \$225,000,000 as compared with the previous year.

Nut culture in the Okanagan Valley is a new industry of much promise and a display from groves of the various varieties is sent to the World's Fair in Riga.

Completing a month's tour of Canada, in the course of which he gave more than 35 addresses before various organizations, mainly Indian questions, the Marquis of Zetland, said for the first time: "Nationalism."

Completed the "submarine" is the only safe vessel for polar exploration," Sir Hubert Wilkins said he not only is planning a second trip under the Arctic ice, but expects to take his wife with him.

Only one state employee—President Albert Lebrun—volunteered a cut in his salary during the recent attempt to balance the French budget. He sent word to the premier to cut his salary 10 per cent.

Industry, Hon. H. J. Munson, Minister of Railways and Canals, told an audience at Fort William, has no right to regard labor as a pool from which men could be drawn in good times and to which he could be returned in bad times.

The Canadian Cancer Foundation has been organized to further the cancer research investigation started by Dr. W. T. Garbath. A firm of manufacturing chemists is now behind the research. Dr. Garbath is the chairman of the foundation.

France's New Super Liner

"La Normande" See Large To Go Through Panama Canal

After France has passed the pride of the United States, she has built a great new super-liner, the world's marine giant. That could be passed over, perhaps, but it won't go through the Panama Canal. "La Normande" is too large to go through that waterway. The width of the canal is 1,000 feet in length and 110 feet wide. The "Normande" is 1,020 feet long and has a beam of 117 feet. They talk of building a lock through the Panama Canal, but present estimates of the third canal call for a length of 1,200 feet with a spread of 125. But even that, in the matter of width, will allow only four feet room on each side of a vessel of the "Normande" size. The "Normande" has none too great a margin for safe handling of so gigantic a structure. However, present maritime trade and financial conditions are not such as to render likely an increase in the size of the world's marine giant's looking capacity for a considerable time in the future. It will be strange if the Panama Canal is outmoded by greater feats of engineering skill.—Brundage Sun.

After two weeks' trial of traffic in London without the yellow caution light, the light has been restored as being useful.

Austria's exports jumped nearly 20 per cent. in a recent month.

W. N. U. 1931

Oranges From Palestine

Shipments Are Transferred To Halifax In Private Condition

The second shipment of Jaffa oranges to reach Halifax this season arrived on the S.S. City of Oran. The modern facilities with which the vessel is equipped enabled it to load some thousands of cases of these Palestine oranges at Port Said, transporting them in prime condition the entire distance to Halifax.

Already this year the quantity of Jaffa oranges reaching the port of Halifax is considerably in excess of all Canadian importations of this fruit during 1932. The fiscal year ending March 31, 1932, showed a total of 4,782 cases of Jaffa oranges entered Canada. This will be the first record of the value of trade with Palestine, previous shipments being 170 cases in 1931 and 281 cases in 1929.

Thrives Under Depression

Municipal Soap Shop In Paris Does Big Business

The Credit Municipal de Paris, which in plain English is the pawn shop, on a large scale, and known as the French "Macy's," is enjoying a unique position being highly satisfied with the much-taught-of depression. The less money people make, of course, the more they tend to borrow, and "Ma Macy's" is doing a roaring trade.

Statistics communicated recently show that during 1931 the number of objects deposited as security for loans exceeded by \$3,000 the total for 1930. And 1932's figures are likely to exceed this.

Completed the "submarine" is the only safe vessel for polar exploration," Sir Hubert Wilkins said he not only is planning a second trip under the Arctic ice, but expects to take his wife with him.

Only one state employee—President Albert Lebrun—volunteered a cut in his salary during the recent attempt to balance the French budget. He sent word to the premier to cut his salary 10 per cent.

Sounds Rather Untidy

To the Uninitiated "Cutting Novel" Means Just That

Newspaper folks know what the joy of "cutting novels" is, but the uninitiated are often mystified. Anyway, a young woman was hired to attend to this job which consists of going through current novels with a blue pencil, excising out unnecessary parts, and then bringing the story down to a length suitable for serial publication. She took her home with her. With a sigh of resignation her mother called to her, "I've laid the scissors on the living room table." "Just what do you think 'cutting novels' means?" her mother queried.

"'Bruder'!" replied the preacher. "If dat's so, it's so. But I was a prayin' de Lord to save us from de sin of intoxication, and dat ain't a 'settin' sin, I dunno what am."

BACON SALAD SANDWICH
Cook the bacon until it is crisp. Butter slices of bread and spread lightly with salad dressing. Add a little chopped lettuce and chopped tomato which has been seasoned with salt and pepper. Add crisp bacon, and put on the remaining slice of bread.

KNOW WHAT HE MEANT
A preacher told of a negro preacher who prayed daily that his colored brethren might be preserved from what he called their "upsetting" sins.

"'Bruder'!" said one of his friends at the close of the meeting. "You ain't prayin' for us colored people, are you?"

"'Bruder'!" replied the preacher. "If dat's so, it's so. But I was a prayin' de Lord to save us from de sin of intoxication, and dat ain't a 'upsetting' sin, I dunno what am."

+ Do You Know? +

SLIM LINES AND SMARTNESS

It's amazingly simple to copy! Today's model is stunning carried off in dark and light grey crinkly crepe.

The soft neckline is extremely becoming to the hips but not carried too far to make them look thin.

The blouse has the skirt cut in one with the hip yoke, creating a panel which tends to give the figure height. The round skirt is slightly shaped for ease of movement.

With a few simple steps you can copy it exactly for a very small sum.

It's a dress you can wear now and all through the winter. Style No. 480 is designed for sizes 36, 38, 40, 42, 44 and 46 inches bust, with 30, 32, 34, 36, 38, 40, 42, 44, 46 inches waist, with 1½ yards 30-inch contrasting.

Price of pattern 20 cents in stamps or coin coin is preferred. Wrap coin carefully.

VETERAN WAR CORRESPONDENT WEDS

The marriage of Mrs. W. M. Neary, veteran war correspondent, and

Miss Evelyn Sharp, author of a number of children's books and novels, was celebrated in a friendship which began thirty years ago when the two journalists were comrades in the fight for women's suffrage. Our picture was taken after the ceremony at the couple left the Town Hall, Hampstead, London, England.

SUNDAY SCHOOL LESSON

FEBRUARY 19

JESUS TEACHING BY PARABLES —THE GROWTH OF THE KINGDOM

Golden Text: "The earth shall be full of the knowledge of Jehovah, as the waters cover the sea."—Isaiah 11:9.

Lesson: Mark 4:21-34.
Devotional Reading: Psalm 119:35-40.

Explanations and Comments

Responsibilities of Disciples, verses 22-25.—"Behold, ye are the salt of the earth, the kingdom of God is in you; and if the salt lose its savor, what then?—Savor" (verse 11), and now He goes on to tell them that privilege carries with it responsibility; if they insight into the truth, they must share it. That of the multitude theirs was the responsibility of making use of it for the common good.

"...Is the lamp brought to be put under a bushel, or under a bed? Is not a lamp brought to give light?"

"...Let your light so shine before men, that they may see your good works."

"...Heaven deck with us as we with lighted torches do."

"...Not light them for themselves, for our virtues."

"...Did not he go forth from us, 'twere as though had them not."

"...As though had them not."

"...What you get from listening depends on the kind of music you listen to. If you are indifferent to it, it is being said, or if your mind is so distracted that although you hear it, you do not listen to it, then you are not profiting from your hearing. What you get from any sermon depends on the kind of music you are listening to. If you bring an attentive ear and a receptive heart, then you receive what you get."

"...The Power of Growth Inherent in Spiritual Things, the Parable of the Mustard Seed."

The seed is the Word of God, we learned in the parable immediately preceding this verse. Now we are told of the seed's mysterious growth, of the seed's orderly growth, of the seed's growth in the earth, of the grain in the ear, and then of the fruit-bearing power of the earth and of the whole field of full harvest.

No Good Unless Spread

Value Of Gold Lessened When You Spread It Up

It rested well in the hands of the present gold standard and our countries whether gold was to be sold or not in relation to the value of the dollar.

"...If the value of gold is to be sold or not in relation to the value of the dollar, then it is up to the government to decide whether gold is to be sold or not, or two or three might do it."

If you bring an attentive ear and a receptive heart, then you receive what you get from listening to the kind of music you listen to. If you are indifferent to it, it is being said, or if your mind is so distracted that although you hear it, you do not listen to it, then you are not profiting from your hearing. What you get from any sermon depends on the kind of music you are listening to. If you bring an attentive ear and a receptive heart, then you receive what you get.

Finds Business Profitable

Winnipeg Ice Company Growing

Minnows in Frozen Space

Introduction of the iceless refrigerator put several large ice plants in the discard. The Arctic Ice Company found a need for ingenious use for the surplus from its 26,300,000 bushels of ice.

It is to 21,000,000 bushels of which the oats and barley crops were larger in 1932 than in 1931, and as in the case of wheat, the Prairie Provinces were the principal producers of oats.

The aggregate value of all Canadian field crops in 1932 is estimated at \$416,568,000, as compared with \$432,335,400 in 1931. The total area under field crops is estimated at 56,875,500 acres, as compared with 58,074,900 acres in the previous year.

The 1932 total yield of oats for the

Domestic market was 391,561,000 bushels from 13,148,400 acres, an average yield of 29.8 bushels per acre. Barley yielded an aggregate crop of 80,737,000 bushels from 3,757,600 acres, an average yield of 21.4 bushels per acre.

With the oats and barley crops were larger in 1932 than in 1931, and as in the case of wheat, the Prairie Provinces were the principal producers of oats.

The aggregate value of all Canadian field crops in 1932 is estimated at \$416,568,000, as compared with \$432,335,400 in 1931. The total area under field crops is estimated at 56,875,500 acres, as compared with 58,074,900 acres in the previous year.

The industry, so far as Winnipeg is concerned in winter, is "velvet" and the city has been a quiet, uneventful luxury until this year. When the plant was started mushrooms were \$1 a pound. Today they are only 50 cents a pound, consumption having been cut in half.

Business for canning and freezing has increased, and the company is not worrying that only one or two could enjoy the large market.

In France they were beginning to realize that gold was very much like the large cake the schoolboy mistakenly kept to himself until "it went bad."

So we came back to the old proverb. "Money, like music, is good unless spread." That was true of gold and gold coin only, not any other form of money, and gold coin only. To identify its ownership, gold coin has to be divided into smaller amounts of gold if it is to be spread, and always aided interchange of goods. The moment we became frightened of that interchange, the value of gold was a dead loss.

British common sense, backed by bitter experience, ought to take us into the councils of the nations better equipped to solve the problems that confronted us, and meanwhile it behoves everyone to try individually to master the problems.—Sir Josiah Stamp.

Taking a Holiday

He was standing on a corner, occupying absolutely no attention to anyone. He shook his head and mumbled to himself: "No, no—no, no, no!" He paid no attention to the crowd that gathered, but just kept saying: "No, no, no!"

A police shook him by the arm and said: "What's the matter, my friend?"

"Nothing at all," came the reply. "I'm just a 'yes man' taking a day off!"—Railroad Trainman.

Quite Intentional

Insurance man (putting questions to cowboy)—"Ever had any accidents?"

"Never was the reply.

"Never had an accident in your life?"

"Nope. A rattler bit me once though."

"Well, don't you call that an accident?"

"Never—he bit me on purpose."

"Nothing at all," came the reply.

Canada's Wheat Crop

Final Estimate For 1932 Plots Yield

26,300,000 bushels

The total production of wheat in Canada for the year 1932 was 26,300,000 bushels according to the final

official estimate made by the Canadian Government Bureau of Statistics.

According to the estimate, an average

yield of 29.8 bushels per acre.

The total production of wheat in Canada for the year 1932 was 26,300,000 bushels according to the final

official estimate made by the Canadian Government Bureau of Statistics.

The total production of wheat in Canada for the year 1932 was 26,300,000 bushels according to the final

C. C. F. MOTION SUBJECTED TO MUCH CRITICISM

Ottawa, Ont.—Resolution of J. S. Woodsworth (Socialist, Winnipeg North-Centre), for a co-operative commonwealth came under discussion again in the House of Commons.

The conclusion of the resolution was "that in the opinion of this House, the government should immediately take steps to begin the setting up of a co-operative commonwealth in which all natural resources and the socially-necessary machinery of production will be used in the interests of the people, and not for the benefit of the few."

He did not know what the resolution meant so he proposed "to ask the mover 55 questions," remarked J. P. Fulton (Liberal, Temiscouata), at the end of the speech.

This raised a laugh.

"Put them on the order paper," suggested J. D. Chaplin (Conservative, Lincoln).

R. C. Anderson (Conservative, Estevan) voiced his opposition to anything that savored of Communism and strongly advocated the "back to the land movement." Congratulating the government on what it had done on this subject, Dr. Anderson urged caution.

D. G. D. Stanley (Conservative, Calgary East), said the Co-operative Commonwealth was a "founding left on the doorstep of Calgary." As a "founding" Calgary had given it to the people, but the government, however, the moment came recently that Calgary found it necessary by a large majority to notify "the founding left on the doorstep" that the Co-operative Commonwealth was not wanted. It was no longer welcome and that "it must transplant itself to other parts."

Several clashes occurred between Dr. Stanley and Mr. Woodsworth, the latter denying several statements attributed to him. Dr. Stanley stated that in 1919 Mr. Woodsworth was among the leaders of the One Big Union.

"I deny the truth of that statement," shouted Mr. Woodsworth. "I was not a leader and not even a member."

Dr. Stanley then charged that Mr. Woodsworth had been one of the most outstanding defenders of the One Big Union, and this was denied.

"We have had these new parties for a long time," remarked Hon. W. R. Motherwell (Lib., Melville). For instance, there was the Drury Government in Ontario. What had those things done? He asked him, when he was taken from the tail of the plow and put into the parliament of the biggest province of this Dominion. To be and behaved out of his mind, he said, himself, in the legislature before very long. Is that the new social order that we are to follow? Is that the new day which is about to dawn on us?" Mr. Motherwell asked.

"In Saskatchewan, he said, "the Farmer-Labor party has done more harm in pulling down co-operation within the last three or four years than the whole gang of them have done in the last 100 years." He went up to the spot of the building up of the wheat pool in that province. "I think it was the most magnificent co-operative structure that I have known anywhere," he said.

Alberta House Meets

Usual Pomp and Ceremony

Edmonton, Alta.—With a blizzard wind blowing the snow over parliament hill and amid the usual pomp and ceremony, Alberta's legislature was opened in a stately and business-like manner, February 8th.

Hon. W. L. Walsh, Lieutenant-Governor of the Province, was escorted into the legislative chamber by officers of the militia and read what proved to be a brief speech from the throne.

Naming its special committee to report on standing committees, the legislature prepared for this phase of its work before the adjournment Thursday afternoon.

News for British Taxpayers

London, Eng.—British taxpayers are breathing more easily. When the Nationalists, who were in power in the Exchequer, would make no economies of reduced taxes, he did not think he took an inquisitive House of Commons that increased taxation will be necessary this year.

W. N. U. 1981

Deal Reaching Critical Stage

Barter Scheme With Russia Still Being Discussed

Ottawa, Ont.—Negotiations looking to a barter of Canadian cattle for Russian oil and coal are reaching a critical stage, it is believed here. The scheme was proposed by the Canadian syndicate headed by G. O. Berkan of Winnipeg, is still afoot but the near future may determine whether or not negotiations will be dropped.

When the syndicate was approached by the government with a plan whereby, to ensure the deal going through, Canada would guarantee Russia seven per cent bonds accepted as interim payment for cattle and at the same time guarantee the syndicate against loss of contract on the part of the Soviet government, it was turned down.

Since then sponsors of the idea have learned they may be able to have sufficient time to discuss the scheme with the government.

It is understood that the plan

is to exchange without monetary assistance but before putting money into it they want to be sure they

will be able to bring the necessary quantity of Russian products into Canada and dispose of them.

Mining Boom

Activity in Mining Stocks Gives Employment the Market

Ottawa, Ont.—Stocks have been restored to more than 100 former brokerage house employees in Toronto as a result of the recent activity in mining stocks. Started several weeks ago, it was not until this week that brokers' offices were again open for business.

Miners said that the inflow of foreign and Canadian money continually stimulates the sale of wildcat and small employment in exploration work and actual mining.

May Attend Conference

Three British Ministers Provisionally Selected To Go To Washington

London, Eng.—It was understood in Whitehall that a provisional arrangement has been made for Prime Minister, Ramsay Macdonald, and the Board of Trade and subject to requirements of the April budget—Chancellor of the Exchequer Neville Chamberlain to go to Washington for discussions on the financial and economic problems of the United States administration.

If all three are able to go, the three principal elements in the National government will be represented—National Labor, Liberal and Conservative.

Peace Movement

French League Spokesman Makes Appeal To Nations To Lead the Way

Geneva, Switzerland.—Former general Joseph Paul-Boncour closed general peace meeting of the French League with an appeal to European countries to create their own security through regional pacts like the Locarno treaty as an accomplishment to arm reduction.

He said, "In the interest of peace, in the chances of concluding a unilateral guarantee of security, made an appeal to the United States to take the lead in moves to implement the Briand-Kellogg pact."

Not Guilty Of Libel

Toronto, Ont.—Written verdict of the jury found P. D. Rose, publisher of the Ottawa Journal, not guilty of libelling W. T. R. Preston of Port Hope, in the \$20,000 damage suit brought by the former Ontario premier. "We find that Mr. Rose has had an honorable public career," the jury deliberated two hours before returning a verdict.

House Pyramid Of Butter
Toronto, Ont.—A 4,681-pound pyramid of butter, all from the cream of one cow, was on display during the Holstein Friesian Association's annual meeting held here, February 9. At the conclusion banquet Premier George A. Henry presented a gold watch to the owner of the cow, T. R. Duthie, Woodstock.

Would Raise Standards

Ottawa, Ont.—Convinced of the need for a more exacting standard of the engineering profession, the annual meeting of the Engineering Institute of Canada convened a special meeting of the council in Montreal to discuss the report of the development committee. The report recommended a drastic raising of the standards.

Ottawa Discusses Wage Cuts

House Takes First Step In \$8,000,000 Payroll Reduction

Ottawa, Ont.—Negotiations looking to a barter of Canadian cattle for Russian oil and coal are reaching a critical stage, it is believed here. The scheme was proposed by the Canadian syndicate headed by G. O. Berkan of Winnipeg, is still afoot but the near future may determine whether or not negotiations will be dropped.

When the syndicate was approached by the government with a plan whereby, to ensure the deal going through, Canada would guarantee

Russia seven per cent bonds accepted as interim payment for cattle and at the same time guarantee the syndicate against loss of contract on the part of the Soviet government, it was turned down.

Since then sponsors of the idea have learned they may be able to have sufficient time to discuss the scheme with the government.

It is understood that the plan

is to exchange without monetary assistance but before putting money into it they want to be sure they

will be able to bring the necessary quantity of Russian products into Canada and dispose of them.

THE FIRST SEA LORD

Admiral Sir Ernest Chatfield, photographed in the Admiralty on his first day after succeeding Admiral Sir Frederick Field as First Sea Lord.

Use Canadian Ports

Senate Railway Committee Approves Policy Of Use Of Canadian Ports

Ottawa, Ont.—The senate railway committee has recommended its approval on the policy of moving Canadian goods for export over Canadian railways to Canadian seaports. More than a mere declaration of principle, the committee proposed to the Senate that, without a specific amendment in the present rail bill, give a specific direction to the trustees of the Canadian National railway that, unless a shipper indicates otherwise, all goods consigned without a stop and setting the United Kingdom supremacy.

The brilliant flight of Squadron Leader O. R. Gayford and Flight Lieut. R. E. Nicholls brought the Royal Canadian Air Force into the record books.

Miners said that the inflow of foreign and Canadian money continually stimulates the sale of wildcat and small employment in exploration work and actual mining.

In the afternoon of the 16th, Hon. G. M. Martin went to the railway station at the demands sought by the delegates from the Maritime provinces, who had appeared before the senate committee. Such a course was in line with Canadian policy. It had been agreed that the agreements under which the transcontinental railway was constructed.

Parliament had not the authority to enact such a provision in relation to the Canadian Pacific but it had the power to do so for the transcontinental road, said Senator Meighen.

Toronto Bank Robbery

Two Armed Men Escape With Large Sum Of Money

Toronto, Ont.—Two armed men walked coolly into the Bank of Toronto branch at Queen and Kentwood Streets and made their escape with between \$5,000 and \$8,000 in cash.

It was the second bank robbery in the city this week. A few days ago, two men robbed the Royal Bank at Welland, Ont., of \$2,500 and a man alleged to be the other being shot in the shoulder after a gun battle on a busy street with a policeman.

Two clerks and the manager were in the one bank robbery when the bandits struck in. All three employees were locked in the vault.

Lower Bank Interest

Cut Bound To Come Shortly According To Officials

Toronto, Ont.—Interest rates will be cut in the near future, according to Telegraph officials. "It is bound to come," represents heads of banking and trust corporations informed the Telegram. They base their forecast on the firm opinion interest rates on deposits in government savings will be reduced when the new budget is presented.

Within the last time, the manager of the Bank of Nova Scotia and president of the Canadian Bankers Association, has intimated the banks are waiting for a lead from the government.

Four Aviators Killed

Members Of Royal Air Force Crash During Practice Flight

Salisbury, Eng.—Four men of the Royal Air Force were killed when their bombing plane crashed during a practice flight and burst into flames.

A fifth man aboard escaped with burns.

Those killed were Flying Officer Philip, Flying Officer, Sergt. A. R. Allard, Corporal Cyril Smith, Corporal Class Athlone, E. G. Scholl, Leading Aircraftsman J. W. B. Hippel, escaped with minor burns.

Awards For Spring Show

\$3,600 In Cash Prizes For Annual Event In Regina

Regina, Sask.—The sum of \$3,600 will constitute the cash prize list for the forthcoming spring show held under the direction of the Regina Exhibition Association.

Announcement to this effect has been made. The show will be held at the exhibition grounds March 21 to 24.

Publication of the prize list will be made shortly.

This year's spring show will be confined to exhibitors resident in Saskatchewan.

Receives New Appointment

Winnipeg Man Now Chief Secretary To Premier Bennett

Ottawa, Ont.—The appointment of K. K. "Bob" Finlayson of Winnipeg, as chief secretary to the Prime Minister, is a public recognition of his services since coming to Ottawa. Finlayson has been a close confidante of the leader of the government. He does not function as a private secretary. One could frequent Mr. Bennett's office of offices indefinitely and never see him. He does not meet the public, but works in a little office tucked out of the way in the East block—20 paces from his chief.

Ship Wheat To China

Buenos Aires, Argentina—Twenty-two thousand tons of Argentines wheat have been sold to Shanghai millers and are to be shipped in March.

This follows a recent westward shift in the wheat market.

Big development is expected in central Saskatchewan, northeast Saskatchewan and northwest Manitoba, in the Swan River district, also in the districts between Claresholm and Edmonton, and from Edmonton west to the Rockies.

One of the problems in districts where feed is scarce has been partly solved by using wheat and what was formerly considered to be the best wheat in the country—Rumanian wheat.

At the present time, Mr. Powell is busy preparing a circular on the use of Russian thistle as feed. He has secured much information and is investigating farmers, who have been using this plant, to write an article and forward this to the company.

Mr. Powell expressed much satisfaction at what had been accomplished by the Agricultural Credit Committee to date, and believed that the market for wheat in the districts of Claresholm and Edmonton would be reconstructing their farms and within a short time would be out of trouble.

Unclaimed Bank Balances

Ottawa, Ont.—A total of \$92,530 worth of unclaimed money can be liquidated by the city if the city accepts the recommendation of the sub-committee of the special scrup committee.

Alderman J. W. Russell, chairman of the committee, said this recommendation would be made shortly to the council.

Calgary May Issue Scrup

Calgary, Alberta—A total of \$92,530 worth of unclaimed money can be liquidated by the city if the city accepts the recommendation of the sub-committee of the special scrup committee.

Ottawa, Ont.—The report of unclaimed bank balances tabled in the House of Commons by Hon. E. N. Morris, Minister of Finance, reveals that there is \$1,600,196.75 of unclaimed money in the banks throughout Canada.

The Child Problem

Great Care Should Be Exercised In Administering Punishment

Punishment of a child should not be lightly undertaken. Punishment is ineffective unless the child understands who it is administered; it is self-justified if it is administered in the child's mind; its corrective purpose is nullified if it is customarily disproportionate to the offence. Moreover, what is a proper punishment for one child is often inappropriate for another. Some children are so constituted physically, nervously and mentally that they never should be whipped; others should be spanked; others should be made to stand; others should be spanked in a humiliating form which the penalty it describes can take; others should not be deprived of favorite playthings; others should not be compelled to go without an article of food for which they are particularly fond.

Each child is a problem by itself. The ideal treatment of a child is that which by punishment or reward, guidance or suggestion, will bring about the best results in the child's standing. The worst treatment is that which brings down on a child suffering, mental or physical, for innocent errors, for misunderstandings due to ignorance, for stupidity, bad temper or short-sightedness, but which, either through carelessness or ignorance, inflicts pain and suffering deliberately inflicted the purpose of which the child does not comprehend.—New York Sun.

Second Largest Gold Field

Mines Of Northern Ontario Are the Second Largest in the World

Gold produced in the year 1932 was valued in Northern Ontario at \$41,635,878 over the value in 1931. At the end of last year 19 mines were reporting production compared with 15 at the beginning of 1932. The mines produced 1,065,000 oz. of gold, the year before review of 1,320,000 tons was reported to be produced by the Porcupine Camp. 1,799,961 tons to the Kirkland Lake mines and 1,703,620 tons to mines in the Northwestern district. Gold was also produced at the Kirkland Lake mines led with an aggregate output valued at \$23,682,000. The Porcupine mine came next with production worth \$21,465,247, followed by the mines in the Northwestern field with an output value of \$1,625,000.

In December 1932 the production of Ontario gold mines totalled \$4,135,536, which was the second high monthly output on record. On two other occasions, during the year June 1932 the gold mines in the province recorded production in excess of four million dollars in a single month, the May output being \$4,079,320, and for June, \$4,179,045. The amount of gold output reported in 1932 was \$31,023, over the November previous production of \$39,843,000.

The gold mines in Ontario are the principal source of supply of the Canadian government and the Canadian metal and the second largest valuable gold-producing area in the world, being exceeded only by the Rand mines in the Transvaal, South Africa.

The Canning Industry

Exports Of Canned Tomatoes And Fruits Heavy Last Year

Canned tomatoes exported from Canada in 1932 amounted to 13,238,203 pounds, an increase of 6,823,813 pounds, or 33.914 tons to that of 1931. This substantial increase was due to the demand of over 10,000,000 pounds to the United States where a tomato shortage was reported. In 1931 Canada exported 13,914 pounds only to the United States. The demand for canned fruit, particularly peaches, increased from 5,239,262 pounds in 1931 to 10,285,296 pounds in 1932. This increase was mainly due to larger shipments to Great Britain which amounted in 1932 to 9,329,780 pounds as compared with 1,911,678 pounds in 1931.

Ship Ice To Churchill

Train Carries Several Carloads To Northern Port To Be In Dining Room Of New Hotel

"Carrying ice to Churchill" has supplied the press "coals to Newcastle" on the Hudson Bay Railway. The "Mudler Limited" arrived at Churchill over the snow-covered ice of the Far. It is to be used next summer in dining cars. It was found more economical to ship the ice from the southern terminal than to send men to Churchill to cut it.

Half a teaspoonful of baking soda added to boiling frosting will keep it from running.

W. N. U. 1932

SCENES FROM THE AUTOMOBILE STRIKE FRONT

A scene outside the plant of the Briggs Body Manufacturing Company, at Detroit, Mich., as hundreds of strikers picketed the plant to prevent strike-breaking. The factory is running with a skeleton force of new workers, an attempt to employ the Ford Company's tough busters to enable resumption of production of new cars which was stopped by the strike. A large force of police is on hand to quell possible disorders. Inset is a photograph of a man who was slugged as he was going to the Briggs plant to spy for work in defiance of the pickets, being aided by police.

The Lightest Wood

Balsa Wood Is Much Lighter Than

Our attention has been drawn to the numerous industries in which balsa wood is now used. It enters into the manufacture of aircraft, boats and trunks, and is also utilized for board packing, heat insulation and insulation of steam and chain drives. The wood is the extreme lightness, this being due to the openness of the grain and the presence of a large amount of air. The average weight per cubic foot is from 7 to 8 lbs. The wood is very light, a raft for cork of from 11 lbs. to 13 lbs. The name is derived from the Spanish word balsa, meaning a raft, for when the Spanish conquerors first came to South America, they saw the Indians using these rafts; incidentally, it is also used for the same purpose. Messrs. The Balsa Wood Company, Limited, of Aylesbury, House, Kingway, London, are among the largest manufacturers. Several varieties of the timber are widely distributed in central and southern North America, the best variety comes from Ecuador and possesses the botanical name, *Ochroma pyramidalis*. The growth of the balsa tree is extremely rapid, reaching 50 feet in height and 3 feet in diameter being obtained in from 4 to 5 years. Immediately after felling, the timber is full of sap, and as it is heated, the sap is driven out. The wood is stripped off and the logs sawn up into planks, ranging from 4 feet to 15 feet in length, 6 inches to 15 inches in thickness, and 1 inch to 4 inches in thickness; it is then cut into 2x4s and 2x6s. The wood is extremely light and is used for the manufacture of plywood for aircraft, boats, trunks, and also packing cases for all types of highly-polished and delicate objects, the silky texture of the timber does not scratch smooth surfaces.

It is also used in connection with the sound-proofing of rooms and electric motors and in insulation work, particularly on vehicles conveying solid carbon dioxide and other chilling materials.—From Engineering.

List Of Immortals

Dr. Bunting and Dr. Best Are In Line For Nobel Prize

Dr. Frederick G. Bunting and Dr. C. H. Best, of Toronto, co-discoverers of insulin as a treatment for diabetes, are in line for nomination to the list of "immortals" who will be honoured at the annual meeting of the Royal Society of Canada, to be held at the University of Alberta, Jan. 19. Dr. Best, a native of Galt, Ontario, will figure in history, first, particularly, as he increased from 5,239,262 pounds in 1931 to 10,285,296 pounds in 1932. This increase was mainly due to larger shipments to Great Britain which amounted in 1932 to 9,329,780 pounds as compared with 1,911,678 pounds in 1931.

In the list Dr. Muzney, professor of American history at Columbia, Canadian men and one woman, as "immortals." James Jerome Hill, Canadian-born railroad pioneer, among them.

Hill, named an "immortal" for his public works, was born a farm boy near Guelph, Ont., in 1838.

Visits Scene Of Old Job

When John Mansfield, post laureate of England, visited New York City over the weekend, he visited an old saloon where he worked as "boy" many years ago. The old bar was located at Christopher and Washington Sts., Greenwich Village section.

Practically all large banks in Germany are now under government control.

Practically all telephone equipment used in Britain now is British made.

Too Speedy For Test

New Aeroplane Can Stoof In Low Altitudes

Anyone possessing a large building, say three or four stories, that twice as fast as present planes would fly at an altitude of between 10 and 20 miles in the rarified atmosphere far above the clouds, fog and prevailing winds.

These experts have designed an airplane capable of a speed of 1,000 miles an hour, but they cannot test it on a large scale in the heavy air of low altitudes.

The airplane, Dr. Klein said, is correct theoretically. Its speed of 1,000 miles an hour is more than twice as fast as present planes would fly at an altitude of between 10 and 20 miles in the rarified atmosphere far above the clouds, fog and prevailing winds.

This super-plane, as proposed by Dr. Klein, would be propelled by the burning of gasoline in long, open-ended tubes. An engine of great power would first be necessary to move the air at great speeds before the rocket apparatus would begin to function.

As top speeds were attained by the use of internal combustion engines, expulsion of gases from the engine would increase the flying speed tremendously, Dr. Klein believes.

Each tube would take off a portion of a long tunnel, open at both ends, which would be the rocket runway.

The central channel of the tunnel would be much larger than the ends. Dr. Klein explained, The air, at high speeds, would rush into the tubes with such force that the compression would heat the air, causing it to expand.

Jets of burning gasoline in the central portions of the tube would cause additional expansion, causing the air to burst from the tunnel with terrific force.

Theoretically, Dr. Klein says, the exhaust from these tubes would move more than equal the air blast from a dozen propellers.

Man's Useless Friend

Dog Always Faithful and True Under All Circumstances

The most ungrateful mammal friend a man may have in this selfish world, the one that never proves ungrateful or treacherous, is the dog. A man's dog stands by him in prosperity or poverty, in health or in sickness. He is a true friend, a constant and faithful companion.

Here is a genuine frontier life, centered around a heterogeneous assemblage of humanity—the old Hudson Bay Company men, the swarthy swagmen who manned the traps, the Indians over six-tenths logging rags, professional gamblers, petty crooks, brawling bartenders and the other habitués of the frontier who place the mecca of the backwoods to the west.

Then the forests divided; Craigville withered and now the snow on Main St., once aglow with the light of kerosene lamps, shone through frosty windows, tramped through drifts of snow and ice, crossing from the highlands back of Craigville to the swamp beyond.

Few Immigrants

Total For The Calendar Year Given

As 20,591

A continued falling off in immigration to Canada in 1932 is shown in the following table. The calendar year down to 20,591 compared with 27,530 the previous year. United States supplied the bulk of these, 13,709, while 3,327 came from the British Isles. North European races made up 909 of remainder and all other races, 2,646.

Ontario got the largest share of immigrants with a total of 9,312. Of western provinces British Columbia received 1,950, Alberta, 1,692, Saskatchewan 971 and Manitoba 757.

Technocracy On The Farm

Does Not Furnish Market For Products Or Lift Morale

Although labor is available now at lower cost than for years, and movement of unused men would be welcomed with open arms by aeronautic experts of California Institute of Technology.

These experts have designed an airplane capable of a speed of 1,000 miles an hour, but they cannot test it on a large scale in the heavy air of low altitudes.

The airplane, Dr. Klein said, is correct theoretically. Its speed of 1,000 miles an hour is more than twice as fast as present planes would fly at an altitude of between 10 and 20 miles in the rarified atmosphere far above the clouds, fog and prevailing winds.

This super-plane, as proposed by Dr. Klein, would be propelled by the burning of gasoline in long, open-ended tubes. An engine of great power would first be necessary to move the air at great speeds before the rocket apparatus would begin to function.

As top speeds were attained by the use of internal combustion engines, expulsion of gases from the engine would increase the flying speed tremendously, Dr. Klein believes.

A new type of tractor that requires less than a man to drive, has the sunburst, a pulling power of four draft horses. It costs no more than the average small motorcar, does well work and supplies power for binders or other machines hitched to it.

A machine which brushes, grades and pollishes 1,000 bushels of potatoes a day, being something similar to a recently invented machine which harvests 100 bushels of grain a day.

A new type of tractor that requires less than a man to drive, has the sunburst, a pulling power of four draft horses. It costs no more than the average small motorcar, does well work and supplies power for binders or other machines hitched to it.

A new balloon-type of tractor which has a sunburst, a pulling power of four draft horses. It costs no more than the average small motorcar, does well work and supplies power for binders or other machines hitched to it.

FANCIFUL FABLES

FIRE LOSS Was Low
Saskatoon, April 25.—Fire losses in Saskatoon, rating itself on the back. Its 1932 fire loss totalled \$1,525,000. Fire Chief John McDougald reported at the council's meeting last night. Inspection work was carried on throughout the year and citizens instructed in matter of fire prevention.

Chicago Typists Have Work Checked By Hidden Camera
Fifteen typists in an office in Chicago, Illinois, are having their work checked by a hidden camera to prevent them from taking time off without pay. The typists are shown to have motion picture slackness on their work.

Traffic lights have been installed in more than 200 towns in Great Britain.

CHAPTER V.—Continued.
"And capture these men and get the credit? No! Haskell! He is too wise. Getting those bandits seems second nature to him. So long as he sees his face, he deserves to be captured or he gets them or not. That Incan patro is dead. It was our best hope, but now it can't ever be. I could bring up trouble for him; I could bring up an investigation, but that would take months. I can't be late then; those bandits will be gone."

She repeated, brokenly: "Gone, gone—yes, it'll be too late then, Alan, that means—mean Dad will be found guilty—and sent to prison—or worse."

For the second time in the years he had known her, Joyce broke down and cried. It hurt Alan as few things in his life had ever done. He felt her sobbing against him, as he thought of this traitor whom his mother, her best friend, had sent him. His plan was swept away. With those bandits safe in the wildness of the Thail-ka-zah, Dave MacMillan would be too far away to work up a case. It would break Joyce, his wild-born nature. When he thought of the terrible stigma upon a girl so innocent and brave, he swore silently:

"I'll be brought down to that. I'll get them, I'll bring them to trial into court."

He realized fully that he was starting on a long trail, a trail never to be retraced. He was committing himself to a course of action he had not had the courage to traverse; that path, in honor or he could do nothing else.

He rose abruptly, brushing away his last trace of hesitancy; and gave Joyce his hand to rise.

"Joyce, there's something I've got to do now. I've got to go. You mustn't stay here. Come." He took her arm, and as they went down the slope, he asked: "I want to see you again before I—some final arrangements will be made. I'll be back to you down in the wharf in half an hour."

Wondering in his odd tones, his stern purpose manner, Joyce promised him.

At Mr. Drummond's house he left her and started out along the trail to Haskell's cabin.

Across the deck he demanded, with no preliminaries:

"I want to buy out. Tonight! Here! Now!"

Haskell's eyes narrowed in suspicion. He could hardly believe it. He knew how deeply Baker was rooted in his work and friendships and life in the northern country; and he could scarcely conceive of Baker liberally throwing away a long brilliant police record at one irredeemable step.

SIMPLY WORN OUT?
Take Lydia E. Pinkham's
Vegetable Compound

Can anything be more wearisome, for men and women, than to be constantly fatigued? You have no time to be active, you have no energy to do your work, you have no time to be with your family . . . something hangs over you . . .

Lydia E. Pinkham's Vegetable Compound will help you. Its magic action will give you new energy and strength. Your daily tasks seem easier to you.

It is a simple, safe, natural product to use. It is the result of years of research.

Haskell wrote out the declaration of responsibility. Alan read it. As he wrote his name, he sneered:

But there was no doubting Baker's words. No doubt, no great mistake. Baker was determined to be out to get out for good. As he studied the sergeant, Haskell drew back warily. Baker might be laying some trap for him.

He refused. "I'm too short-handed here as it is now."

"I don't give a d—n about that. I'm buying out."

Haskell's confidence was returning as he saw that Alan intended no physical violence. "If you buy out, your records end. You'll have to start all over."

"I'm buying out for good. There'll be no starting over again. I'm getting out of the Mounted, out of the country."

Haskell delayed swiftly. He was not averse to Baker cutting his own head off; and he saw now there was no trap laid for him. He was content to be contented. He was a good judge, casting back over the last nine months, recalled the score of times Baker had corrected bad mistakes of his and kept the post route safe. He had indeed been a good judge to him that he named the route needed him desperately. And Elizabeth Spaulding . . . Was she going away with Baker? Was Baker taking her with him?

He had seen his act in boasting the sergeant would be boasting against himself. He tried to temperize.

"I haven't the authority to let you. You'll have to make our application wait for permission from headquarters."

"That's the rule for close-in detachments. Down north here where a mounted unit would take several months, it's understood that an officer can accept a buy out on his own recognition."

"But it's not the official rule. Under the circumstances I don't choose to accept your paper. I'll take your offer, though. I'll make you choose! You've busted me, all right; you've saddled the blame and shame of that patrol on me; you've mouthed your lie and you've got a stock pigeon here. I'll take your offer, though. I'll accept your paper."

"Wait a minute! I'll make you choose! You've busted me, all right; you've saddled the blame and shame of that patrol on me; you've mouthed your lie and you've got a stock pigeon here. I'll take your offer, though. I'll accept your paper."

"Wait a minute! I'll make you choose! You've busted me, all right; you've saddled the blame and shame of that patrol on me; you've mouthed your lie and you've got a stock pigeon here. I'll take your offer, though. I'll accept your paper."

"Wait a minute! I'll make you choose! You've busted me, all right; you've saddled the blame and shame of that patrol on me; you've mouthed your lie and you've got a stock pigeon here. I'll take your offer, though. I'll accept your paper."

Haskell lit a cigarette to hide his nervousness. "I asked. Where are you going?" he asked, as he stepped into the cabin. As she stepped into the light, she exclaimed: "Alan! That's the last name of Mrs. Drummond's girl! I demand an explanation! That you're a constable! That he put all the blame of this patrol on you!"

"That's what he did. Alan was wrong, straight up, facing her. He didn't believe he was capable of it. But he shouldn't have been surprised; he's given me cues enough to his nature."

"I'll consent on one condition to buying out. Otherwise you'll have to wait for official and regular approval."

"What's the condition?"

"There seems," Haskell said steadily, with the ability to hold Alan in his grip, "the 'no' to the condition of opinion, from us about the responsibility of this Alasko patrol. If you'll sign a statement to the effect that you had complete charge of the detail and split your patrol with the other, I'll give you a buy out. Otherwise you can't."

"I'll consent on one condition to buying out. Otherwise you'll have to wait for official and regular approval."

"Beer and milk are the two great food beverages, the former bearing somewhat the same relation to the adult that milk does to the infant. They both contain a large amount of carbohydrates, lactose in milk and malt sugar in beer. Both beer and milk contain valuable mineral salts and the two may be compared from the caloric standpoint."
